XII – PCM	G.N.W.S, Greater Noida	2022	92%

PROJECTS

PlacementGPT [Link]

AI-Powered Placement Outreach Automation Platform Jan’26

- Architected a multi-agent AI workflow using LangGraph to automate end-to-end recruiter outreach, including job portal parsing, recruiter discovery, company research, email generation, and email delivery.
- Engineered intelligent recruiter discovery pipelines leveraging Serper API and web search to identify, filter, rank, and deduplicate HR contacts, significantly reducing manual outreach effort.
- Integrated Ollama (Llama 3.2)} for context-aware personalized email generation, producing company-specific outreach messages using recruiter and organizational insights.
- Tech Stack: **React.js, FastAPI, LangGraph, Ollama (Llama 3.2), Serper API, Gmail SMTP, Python, Tailwind CSS**

PlanMyTrips [Link]

AI-Powered Personalized Travel Itinerary Generator March’25

- Developed intelligent travel planning platform using LangChain and RAG pipeline to generate personalized multi-day itineraries based on user preferences, budget constraints, and real-time data from travel APIs.
- Integrated vector database (Chroma) with attraction embeddings to enable semantic search and recommendation engine, delivering contextually relevant suggestions with improved user satisfaction rate.
- It is a modular multi-agent architecture comprising RAG, Search, Weather, Planner, and Optimizer agents, delivering structured itinerary generation with budget validation and PDF export capabilities.
- Tech Stack : **Python, LangGraph, Ollama, Groq, Chroma**

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript
Frameworks/Libraries: Node.js, Express.js, LangChain, LangGraph, Pydantic
Databases: MySQL, MongoDB, Chroma
Machine Learning: TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Rag Pipelines
Tools: Git, GitHub, Postman, Jupyter Notebook , Ollama
Other Skills: Problem Solving, System Design, REST APIs, DBMS, OOPs, Operating Systems, Cross-functional Team Collaboration and Leadership

POSITIONS OF RESPONSIBILITY

C.N. 10x Club (Campus Chapter)

EMERGING CEO JAN’25 – DEC’25

- Served as an emerging ceo by promoting technical programs, learning resources, and events among students through workshops, sessions, and online outreach.
- Increased participation in coding contests, learning tracks, and developer initiatives.

WORK EXPERIENCE

Innoveda Solutions

Greater Noida / India

Co-Founder

Dec’ 25 – Present

- Co-founded and scaled web development agency from inception to serving 15+ enterprise clients, through strategic client acquisition and end-to-end project management.
- Architected **DreamTownRealty**, a full-stack real estate platform using React.js and Node.js with JWT authentication, managing 200+ daily active users .
- Led development of **Kashi-Dream Guest house** hotel booking platform, implementing dynamic pricing modules and payment gateway integration—boosting user engagement by 35% and conversion rates by 22% .
- Delivered 2+ custom portfolio websites with GenAI-powered features, SEO optimization, and responsive frameworks, increasing client lead generation by 50% through strategic architecture and AI integration.

TechPranee

Hyderabad / India

SDE Intern

September’25 – November’25

- Developed 15+ AI-generated web component designs using Lovable platform for **ERPZ** warehouse management system, reducing design-to-code time from 2 days to 4 hours and accelerating prototyping cycle.
- Built reusable code template library using Ollama LLM, generating 10+ production-ready React and Node.js templates that improved team development velocity by across 4-member engineering team.
- Optimized **ERPZ** application performance through GenAI-powered code reviews, worked closely with backend team to design efficient database schemas and ensure data consistency..

ACHIEVEMENTS

- Selected as one of the delegates from 50,000+ applicants in **Harvard PAIR by Harvard University, USA.**
- Anveshan Hackathon 2024 — Finalist** (Collaborated with 5-member team to develop AI-powered automated billing system using computer vision and machine learning, processing 10+ grocery items with 88% detection accuracy and reducing checkout time by 60%)
- Summerhack 1.0 2025 — Finalist** (Built full-stack food ordering platform for college canteen with real-time order processing, capable of serving 50+ students and improving service efficiency by 40%)
- AIR 466, 492, 748, 840 out of 40K+ **in Leetcode Weekly and Biweekly contests.**
- Knight** LeetCode (Rating: 2024), Top 2.24%, solved over 1600+ problems on the platform, constantly uploads and explain solutions have over 50k+ views.
- Pupil** Codeforces (Rating: 1210) , 150+problems.
- Codolio** (Ranking: 302), Among top problem solvers on the platform.
- Other Hackathons:** Flipkart Grid 6.0 and 7.0 , Adobe India hackathon, HackWithInfy 2026, Odoo x CGC, DTU Execute 3.0, Hackfest-Advaita .
